A SIMPLE AND INNOVATIVE WAY TO PREPARE STUDENTS FOR PEER ASSESSMENT

The Peer Assessment Training (PAT) workshop helps students improve both scoring and commenting skills by means of guided activities, self-assessment and peer learning online.

IMPLEMENTATION TIMELINE

PAT WORKSHOP AT A GLANCE

PART 1: ASSIGNMENT & RUBRIC

The workshop begins with information about an assignment and grading rubric. To proceed, students must pass a quiz assessing their understanding about the assignment and rubric.

PART 2: MINI LESSON ON WRITING A CRITICAL & CONSTRUCTIVE COMMENT

Students learn about critical and constructive comments. Mini lessons provide tips for writing quality feedback, with examples of poorly and clearly written comments. Students practice ranking sample comments from best to worst.

PART 3: PRACTICE WITH SAMPLE ESSAY(S)

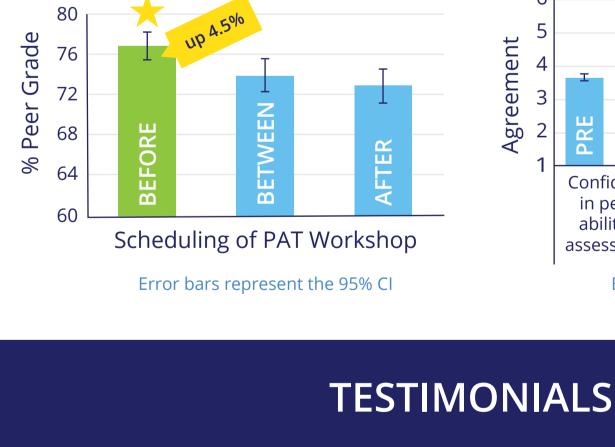

The workshop can make use of one or more sample essays for practicing peer review skills, proceeding through the sequence of steps outlined below.

Does training result in writing Does training result in changing students' perception and better papers?
